BLOCK CI-513

Plays description :

- Structural closures are mainly Albian. These closures have not been tested yet.
- Stratigraphic plays are from Cenomanian to Lower Senonian and are composed of fan-shaped prospective sand bodies.
- Ayame-1X found good sandstone reservoirs in Turonian and Santonian with oil and gas shows. The active source rocks of the well are in Turonian and Cenomanian sections and are fair to good quality. It is composed of mixed type II/III kerogen and suitable for oil and gas generation.
