BLOCK CI-701

3D Seismic coverage 2D Seismic line

Plays description :

- Structural closures are mainly Albian. These closures have not been tested yet.
- Stratigraphic trapping up dip slope fans with favorable migration pathways, are mainly Cenomanian to Lower Senonian and could be in campano-maastrichtian interval.
- Stacked basinal channel-levee systems, good drainage area, intra Maastrichtian to Paleocene seals.
